

SPARTON "ROSEDALE" (#23L2S)

CABINET

Genuine wood in Walnut (W), Danish Walnut (D) or Mahogany (M) (33½" W x 33" H x slim 14" D)

PICTURE TUBE

23" Corning 110° Tube with bonded safety glass (no dust, bigger picture) mounted in the unique "OUT FRONT" position that gives a much wider viewing angle than conventional recessed mounting.

CHASSIS

Powerful de luxe 20 tube Sparton chassis (horizontal arrangement, hand-wired without printed circuits, easily-serviced, well-shielded and cool in operation) with heavy-duty Power Transformer. New "Guided Grid" Triode Tuner for better channel selection, less noise, sharper picture and better "fringe" operation.

SPECIAL BUILT-IN AUTOMATIC CONTROLS

- (1) Keyed A.G.C. system with super-controlled I.F. tubes gives automatic adjustment from local to fringe signals.
- (2) Automatic Black Level Control System for constant picture contrast (no all-over greyness).
- (3) New automatic Picture Size Control (no picture shrinking).

SPEAKERS

Dual hi-fi 8" oval speakers. (Speaker Jack on rear of chassis for connection of external speaker or for use as part of a Stereo System.)

CONTROLS

All located on the front panel. Lighted Channel Selector. Push "On-Off" Switch on Volume Control.
