

# Adjusting Settings on Reunion Slideshow

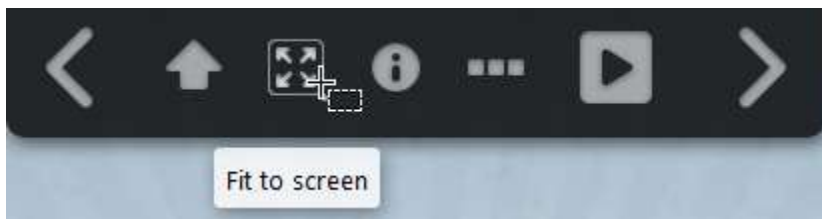

1. Clicking on the back arrow will display the previous picture

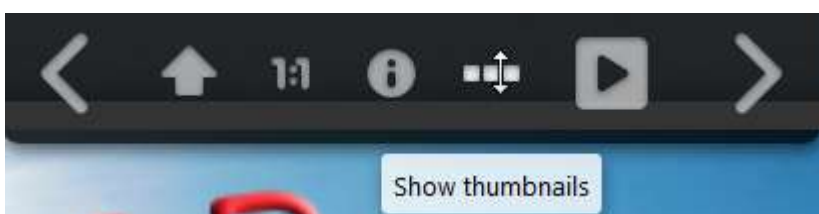

2. Clicking on the Up Arrow takes you back to the index page to view all of the thumbnails

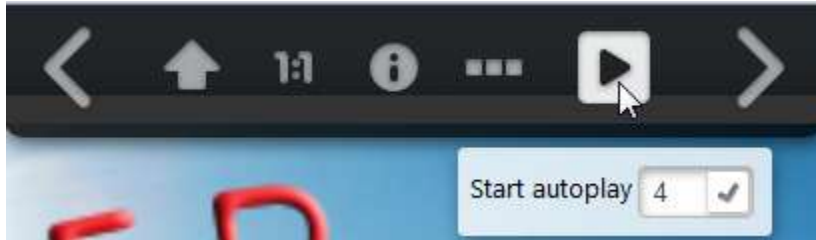

3. The third icon toggles between 'Fit to screen' and '1:1'. If you wish to see the actual size of the image choose 1:1. To reduce the view so the entire image fits on the screen, choose Fit to Screen.

4. Show or Hide Thumbnails- Choosing this icon will toggle between displaying or hiding a row of icons at the top of the window

5. To start a slideshow of all of the images, choose the Start button. By default it is set to display the images for 4 seconds, but you can adjust this setting.

6. Choosing the last icon will display the next picture in the sequence.

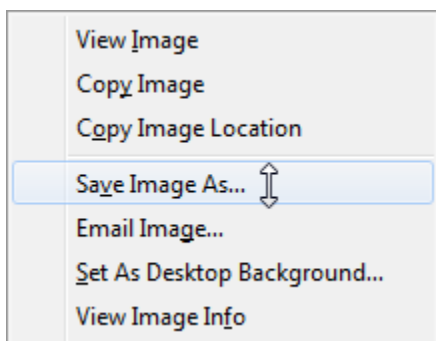

## Saving Photos

---

All of the thumbnails on the index page are linked to the original full resolution file of the image.

If you wish to download a high resolution image of the photo (suitable for printing) you must be on the page devoted to that image (ie not the index page where the thumbnails are posted).

In either 1:1 or Fit to Window viewing mode, right click on the image to display a menu similar to the one shown below.

Choose Save image as, navigate to where you would like to save the image and click on the save button.
