THE ENGLISH LANGUAGE DISCOVERIES RESEARCH

Formerly:

The Word, The English Language Code, Sequations, Supernal-equations and the-s-equations.com

What we 'think' we actually become. This research explains the HOW.

DISCOVERIES on the SUBLIMINAL Influences of CIRCLE Based, MATHEMATICAL THOUGHT PROCESSES.

This Language Research deals with a new discovery in the understanding of Human character and the personal growth of self, through the discovery of a sub-conscious coding built into the English Language.

We count sequentially 1-2-3 and the patterning within language is also sequential in nature.

We have now, not only a door to a new understanding of Human motivations, but also a tool for naturally increasing personal will power and the lasting ability for the development and improvement of our Human Character or Personality.

Using Sound, Vision and the electromagnetic impulses of Thought, a way is presented to balance the imbalances within our mind / brain. Imbalances that can create a variety of problems within the lives of Humans that prevent, balanced harmonious living.

Think about it, a sub-conscious code that determines why we are, as we are.

I believe that many of the mental problems that trouble people will eventually be eliminated when this new knowledge has become more extensively researched, and thereby becomes an integral part of general knowledge.

This research originally dealt with the basic words of language, but I soon came to realize that a Human, given a Name, becomes 'the Living Word'.

This New Science, the study of a coding within our Language allows us to look at our sub-conscious and examine the electromagnetic influences that seem to compel us, like a computer program, into specific actions and responses & these influences have a great deal to do with our general health on every level of our life, Spiritual, Mental and Physical.

This relationship or interaction between energies both internal and external, points directly to the 360 degrees of a circle as having special significance within the brain or mind of Humans.

I have personally come to the conclusion that it would seem normal to me now, if everything in the Universe had at the very least, a variation of a 360 calibration within its life cycles.

Is it not a fact that all the atomic building blocks for all of existence are perfect Circle's? Currently Astrology has provided the only studies related to the degrees of a Circle, the foremost being THE SABIAN SYMBOLS.

I am not an astrologer, but I followed where the research led me.
Please scroll down to see Samples of the Material being covered in this introduction.

The (free) SYSTEMS TEXT...PDF provides the in depth analysis.

THIS RESEARCH deals with the 'ENGLISH' Language only. (6 vowels & 20 Consonants)
The letter (Y) is 'always a vowel'

A single word can be broken down into 17 separate 'Frequencies, Vibrations, Energies?'
The breakdown of these 17 energies and their individual meanings, begins as follows:

The 'alphabets letters' are given 2 separate values, the 1st is the letters
'position in the alphabet' (eg: the letter M is the 13th letter, so its 'first value' is (13).
The 2nd value is called its "Root Value" eg: letter M's 'place Value' is (13),
by adding the (1 and 3 = 4) Therefore 4 is its single digit 'Root Value'.
Root Value #s are a Numerology connection.

Only the first 9 Alphabet Letters (a-i) produce the same 'Order & Root' numbers.

I provide below, a small sampling of the methods simplicity, for greater depth or
Breakdown, I refer you to (The SYSTEMS TEXT PDF) which is FREE for download.

Any 'Word' or 'Name' has a Total of **17** separate 'Frequencies' Or Calculations.
Naturally short words have Frequencies repeating.

Vowels Row..... V3 -- V4 -- V5 / V6 -- V7 (To 'Create Our Wills Values')
Consonants Row..... C3 – C4 – C5 / C6 – C7 (To 'Concentrate' the Will)
Expression Row...E1 – E2 – E3 – E4 – E5 / E6 – E7 (To 'Direct' Will into Activities)

.....These 3 manifest 'Through the Body' the Souls Personality.....

(Vowels = Spirit = Generates) (Consonants = Soul = Concentrates)
(Together = Mind/Body = Distributes)

...The above **17** individual calculations highlight the following characteristics...

1's Spirit (whole).....4's Reasoning (V-C-E).....7's Ability (V-C-E)
2's Material (Body).....5's Creativity (V-C-E).....8's Flow (joined words)
3's Inspiration (V-C-E).....6's Activity (V-C-E).....9's Beat (joined words)

It seems, at least to me, that English Speakers
are largely Christian & right or wrong that is the reason I am using
Word's common to the English Speakers Faith as my examples.

~~~~~  
In the Christian Bible it says: in JOHN 1:1  
In the beginning was the Word, and the Word was with GOD, and the Word was **GOD**.

I found this a compelling reason to begin my research examples with the word **GOD**. We Humans have a lot of Emotions attached to our beliefs, so in the examples shown below I begin with the Discoveries Made from examining that word ( **GOD** ) and then continue to 'words closely linked to it'. My intention is to show the link between the words we use to illustrate Personal Emotions and those to illustrate what generated those emotions.

I believe this is a common emotional encounter for everyone.

I hope to also point to the accuracy of the descriptive words to the described.

Consider that accuracy when considering examination of 'your own Name'.

(I have included a fair number of sample NAMES in the free PDF reference Material.)

The 'Zodiac Degrees' or Numbers listed below, have the Numbers meanings taken from appropriate passages in the Reference Material provided, on one of the free PDF's. I call these Numbers, I think of them as frequencies & have found that they each have their own unique energies and character. Their energies cross the Sight, Sound, Touch & Thought, borders in their conveyances to us. Numbers can be used in so many ways, yet their identity their inner energies remain the same, it's the parameters found within their energies, they have boundaries and within those boundaries is a whole new world of understanding.

~~~~~

In some of the numbers shown below,  
their (#op) 'opposite' 180 degrees away number is included.  
Study will show that reading the (#op) has great importance  
& will often give a much better understanding of the chosen #.

and enduring truths of the race.
- # 320: The blessing of every effort by the “Holy Ghost” of revealed significance.

I have come to the conclusion,
rightly or wrongly that 'THE HUMAN RACE', as a SPECIES has a
Collective Shared MIND (eg: Akashic Records), just as all Species has their own. I
would guess that the Giant Electromagnetic Generating Planets that our Solar System
has created is responsible, along of course, with our races physical requirements.

It will be so nice when people can just accept the obvious, there is only ONE RACE:
'THE HUMAN RACE', (Still struggling to become) 'A HUMANE RACE.'

~~~~~

This free to examine Research Material, gives a clue, I believe, to the 'Origins of Awareness' and I believe it was our 'shared sub-conscious', that chose 6 Vowels, 20 Consonants & eventually the letters as, the optimum Vocalizing Letters for a balanced Language of Frequencies and Vibrations that would Harmonize with Life's Circular Nature. I think to produce a greater ease of, understanding. (That's 'MY' best guess anyway.)

The do-it-yourself format allows for personal study, that I hope will promote, Personal Character Growth, improvement in Personal Preferences and Decision Making and a glimpse at the Potential available to you. Simply consider the following:

'A NAME IS THE LIVING WORD',  
Just add birth #'s for starting point & stir.

~~~~~

A set of Truly 'Simple Mathematical Calculations' (only + and -)
Takes Numbers from a 'Words Letters' (Through Number for Letter Substitutions)
Using the English Alphabet, which has a words pronunciation factor, 'roughly as it looks'.

~~~~~

So Your NAME and BIRTH DATE get converted into actual Astrological Degrees. These calculated results will even interact with your Astrological Birth Material and its authenticity can easily be examined using 'THE SABIAN SYMBOLS' from Astrology. Their Symbols I believe are the best Analysis of the 360 Degree's of the Circle, with an accuracy perfect for this Language Research project. That is, the information gathering for our sub-conscious motivation's & where our Talents or certain Key Interests come from.

A PDF version of the Symbols is provided for your use.
