

INTRO - Page 2

I feel compelled to extend my gratitude to the gifted Psychic that actually envisioned The Sabian Symbols, for without Elsie May Wheeler, who became a Prominent Psychic though spending her entire life in a wheelchair and did, at one point work with Marc Edmund Jones the gifted Astrologer to bring to us 'the Sabian Symbols', without their gifted connection, there would have been no way for me to stumble on their Symbols direct connection with The English Language and its real Magic that can be generated by oneself for oneself.

Elsie Wheelers gift to Humanity cannot be underestimated and her gift for Psychic accuracy under appreciated.

~~~~~

There are so many excellent websites that I would love to link with for your convenience, However, new information and discoveries are presented so rapidly I've decided to simply Offer some suggestions for worthwhile subjects. These I feel offer pertinent details worth noting.

~~~~~

Elliot Wave Principle, Binaural Beats, Fractal Geometry, The Mandelbrot Set, Cymatics, Synesthesia, Prime Numbers, Circadian Rhythms, Musical Ratios, Sound Healing with Water, Crystals and especially Tuning Forks, Musical Tones ratios, Harmonies, Chords, Keys, Octaves.

These and others offer clues as to how our SHARED MIND was able to generate a subconscious code so utterly complex yet amazingly simple to follow.

~~~~~

## REGARDING FUTURE APP'S OR SERVICES

I am hoping to be able to afford a basic APP soon, just for gathering of required information, doing all the calculations automatically & saving others the long hours that I had to spend generating my own data. But it's required for any and all Projections or Flow Directions.

This eventual free app will I hope, prevent the Future need for any 'Services' to do Speculation Readings, since whatever their findings, they must always be viewed as degrees of 'positive' & 'negative' and only the 'Owner of the numbers', 'The NAMED', can conclusively say just how 'Positive or Negative'

an 'Interpretation' is, or how accurate an individuals reflection is presented.

~~~~~

The following brief paragraphs 'in no real order' are
My brief summations of discoveries or points of speculation that I feel still need special attention but are not emphasized in my Original Published Text.
(PDF provided)

~~~~~

Since finding a relationship between Astrological Degrees and the English Language, I have concluded  
From my own research that Tropical Astrology Methods provide accurate data connection and leads me to conclude that the Electromagnetic Energies Generated by the complex configuration of swirling Planets and Moons in our Solar System is behind this connection. I see these interactions as a prime component behind our Human joint consciousness.

But are there ways that would calculate useful numbers representing 'Astrological Houses' or 'Equinox's' etc. Unfortunately nothing has ever been obvious to me, nothing ever jumps out & says IT'S 'THIS # BECAUSE. I tend to think that, 'those

numbers' will be found some how in the SIDERIAL SYSTEM as I think they reflect 'Time' measurements, where as Humans use Local Planetary influences because the 'Time' factor is covered by a 'Birth Date'.

~~~~~

I've been nearly 50 yrs at this research, yet only recently have I come to understand an amazing significance in the 180 degree Opposite 'degree/number' & I recommend they 'Always' be examined with 'Every' Number / Degree under study.

~~~~~

Another discovery is the major importance of the Midpoint 'Number's' (there are 2 main ones), between the SUN and MOON, always examine both of those. It is within those frequencies, there are 2 because of opposites, that a persons 'male & female halves meet' as well as 'the Conscious & subconscious meet'. So they have special importance & should 'appear' in the life often.

~~~~~

I have also found great accuracy in the North/South Nodes, so look closely at those. My experience is they appear in our lives often.

NEEDING EVENTUAL ANSWERS

QUESTION: Is there a valuable # to be studied from the simple adding together the #'s of Prominent Planets or Aspect Positions and discovering a new importance?

All numbers are Frequencies of some sort & activated in our Minds by 'Seeing them', 'hearing them' or 'Thinking about them'.

REMINDER:

It is important to note that personal #'s taken from an Astrological Chart, produce #'s based on the 'main' degree # only, the minutes combine 'with' the main # 'degree' to produce a "Special number, that I've called an EVENT MARKER.

26 is the degree # that shows your place on the circle.

'Sequence your SUN's position #'s 'eg: 26.37 degrees

$$\begin{array}{r} \text{\#117 is AN EVENT MARKER} \\ \text{\#117 is AN EVENT MARKER} \end{array} \begin{array}{r} -25.20 \\ \hline = 117 \end{array}$$

~~~~~

## THE EASTERN PARADOX:

We are BOTH 1 & 2 but we are NEITHER 2 nor 1  
Sabian Symbol # 121....."MAN"

~~~~~

CREATE:

I HOPE THAT A CHAT ROOM FOR "OTHERS" TO
COMMUNICATE AND COMPARE FINDINGS
TOGETHER CAN BE CREATED LATER ON.

COMMON EXPERIENCES IF SUBSTANTIAL
COULD EVENTUALLY BE ADDED TO THE
WEBSITE MATERIAL IN A SPECIAL AREA.

~~~~~

## SYNCHRONIZATION PRINCIPLE

Linking 'Humans' consciousness at the optimal 7.8 Hz  
Alpha brain wave state, as it presently does, actually  
Harmonizes us Humans with our own Planets  
Frequency of 7.8 Hz, this synchronization would allow  
for the Magnification of "JOINED HUMAN WILL

POWER” to the extent of actually giving Human Kind a way to create ‘Absolute Planetary Protection’. The Power of a Joined Mind Creation would rule Supreme I’d expect.

In the English Language the active Principal of GOD 314 is CHRIST 32, being so because it is the place where all forms of Energy are born, in particular it generates the ‘Life Principle’ and controls this, using ‘electrical & electro-magnetic Principles’. It is through a complex interplay of the ‘Life Principle’ that we are given the GREAT ‘MIND ILLUSION’, 320 THE HOLY GHOST.

The only difference between a Word & a Name is the Name has a known Birth Date or ‘beginning point’. This presents the added advantage of Double the information on the “Named”. A ‘Motivational Direction’ is provided through the combination, this Direction & Progress can be followed with various degrees of detail, according to your time & curiosity.

Vibrational Therapy is a recent addition to discoveries & finding a combination of frequencies that 'Destroy' Cancer cells only. I wonder if knowing a Names frequencies can Aid in the previously mentioned research?

### BIRTHDATES:

Birthdates reflect upon our physical selves, whereas our NAMES are reflecting our Spiritual selves.

Astrological 'degree #'s', if minute of birth is reliably known 'wonderful', the closer the better. The Tropical Chart for use with 'Name & Birth #'s', the Sidereal Chart for Sun # comparison and to have the chart on hand, as research grows.

When these 'Name & Birth #'s' of information are combined, they can give distinct information on the 'direction' the Persons life is moving in, for better or worse.

My Research has proven a number of important research discoveries and I will try to relate as many of them as I can manage.

When calculating YOUR OWN #'s, always remember that for the best information found in 'your Names #'s', First check (**E2**) Your Physical Self, (**C4**) Your decision making mind. Then the entire Row 6, (**V6, C6 & E6**) the 6<sup>th</sup> row is where all the action takes place, these 3 specifically should be checked against the list of references I've provided on the PDF's, look at the 'Human Body #'s', those lists that are 1 to 32 & have 2 (31's & 32's).

Some examples to look for would be #'s: 17 Vision, 30 the right eye, 13 the left eye, 32 elimination. Etc. In 'those' positions you should find pronounced activity.

Anybody that finds their surroundings, their home or work place 'Just not? Right', if able, BIG 'IF', they can actually 'Change the Number on the entrance door' or Add a # if there isn't one. "IF able".

Given some time and if the location is then associated 'with' the number, the "Interiors" vibrations, its 'atmosphere' will alter to reflect the new #. Every person that just 'Thinks' of that 'space' by or with the #, speeds up any transition of the interiors 'Mood'.

I myself, through the span of my research have changed 'My Name' 10 times, 3 legally, obviously for longer research. I still Marvel at the "Changes that I went through". My color preferences, my actual vision changed dramatically and my health in general went from one of chronic poor health to a condition of very good health, with seldom any ill health. This was the result well before I had any idea as to why or how these changes were accomplished. But the pronounced changes were certainly the reason I was glued to this research for near 50 yrs. The specific answer I searched for was, how come I went through dramatic physical when all I did was 'Think of myself differently'. You can believe me some changes can virtually overnight. You only need to see yourself as having changed, having adjusted oneself.

~~~~~

CODES:

Codes: are the 'deliberate inventions of intelligent consciousness' & they always have an intentional awareness behind them.

~~~~~

The CLEARER, More eye pleasant a type face or handwriting is, the easier the flow of information to the brain will be accomplished.

You will also read much longer if an easy to read perfect type & size of type font.

The clearer your thoughts the clearer your hand writing, if that were only true, eh.

But if you're trying to actually convey information, then the clearer the better makes good sense.

~~~~~

THE IMPORTANCE OF 3's:

Mind – Feelings - Instincts

The 3 Souls of Man:

Actional – Emotional – Mental
