

## How to slow down a YouTube video playing on a computer:

To change the **Playback Speed** of a YouTube video on a computer, click the Settings icon (the gear-like icon circled in red in picture above) in the bottom portion of the video. You can choose one of the set speeds or choose Custom to enter a different value. A number smaller than 1 will slow it down, a number larger than 1 will speed it up.

## How to slow down a YouTube video playing on a phone or tablet:

To change the **Playback Speed** of a YouTube video on a phone or tablet, click the 3 dots (circled in red in picture above) that appear in the top portion of the video when you touch the screen. Choose one of the set speeds. A number smaller than 1 will slow it down, a number larger than 1 will speed it up.
